

For someone with a \$10,000 debt at an 18% interest rate, it would take nearly 58 years to pay this off, assuming that person sticks to the minimum payment each month. (according to Bankrate.com's credit card calculator, at [www.bankrate.com](http://www.bankrate.com)). Total interest paid during that time would be \$28,931 plus the \$10,000 actual debt.
